## Welcome

Thank you for purchasing TOPDON automotive diagnostic tool Phoenix Plus. Please read and understand this user manual prior to the operation.

## About

TOPDON Phoenix Plus features a full line of high-performance functionality. The accuracy of test readings, the expanded vehicle coverage, the improved speed, and an abundance of user-friendly nature, place the diagnostic tablet in a class of its own, being a great assistance for mechanics and professionals to have more efficient diagnostic work ever.

## Package List

- |                                  |                                 |
|----------------------------------|---------------------------------|
| • Phoenix Plus                   | • Power Adaptor                 |
| • VCI Dongle                     | • User Manual                   |
| • OBDI Adapter BOX Transfer Line | • Password Envelope             |
| • OBDII Extension Cable          | • Non-Standard OBDII Adapter*10 |
| • Cigarette Lighter Cable        | • Fuse (φ5*20mm)*4              |
| • Type-C to USB Cable            | • Fuse (φ6*30mm)*2              |
| • Battery Clamps/Cable Set       |                                 |

## Compatibility

TOPDON Phoenix Plus is compatible with the following protocols:

- |                 |                               |
|-----------------|-------------------------------|
| • ISO 9142-2    | • Lowspeed and Singlewire CAN |
| • ISO 14230-2   | • GM UART                     |
| • ISO 15765-4   | • UART Echo Byte Protocol     |
| • K/L-Line      | • Honda Diag-H Protocol       |
| • Flashing Code | • TP 2.0                      |
| • SAE-J1850 VPW | • TP 1.6                      |
| • SAE-J1850 PWM | • SAE J1939                   |
| • CAN ISO 11898 | • SAE J1708                   |
| • Highspeed     | • Fault-Tolerant CAN          |
| • Middlespeed   |                               |

# Notice

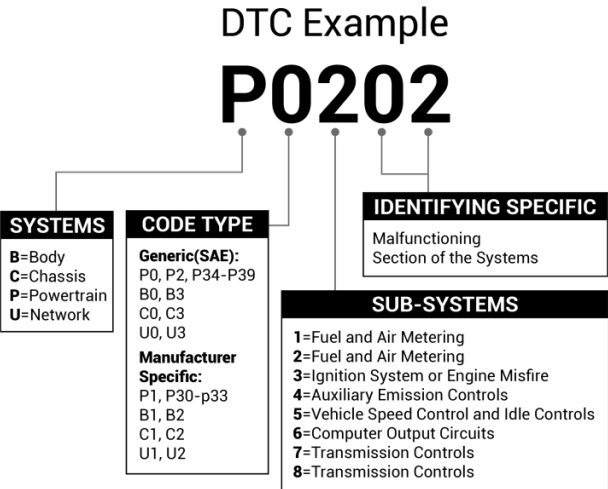

Phoenix Plus may automatically reset while being disturbed by strong static electricity. THIS IS A NORMAL REACTION.  
This user manual is subject to change without written notice.  
Read the instruction carefully and use the unit properly before operating. Failure to do so may cause damage and/or personal injury, which will void the product warranty.

# General Information of OBDII (On-Board Diagnostics II)

The OBDII system is designed to monitor emission control systems and key engine components by performing either continuous or periodic tests of specific components and vehicle conditions, which will offer three pieces of such valuable information:

- Whether the Malfunction Indicator Light (MIL) is commanded “on” or “off”;
- Which, if any, Diagnostic Trouble Codes (DTCs) are stored;
- Readiness Monitor status.

# Diagnostic Trouble Codes (DTCs)

# Product Descriptions

NO.	Name	Descriptions
1	10" Touchable Screen	Show test results.
2	Power Button	<ul style="list-style-type: none"> <li>Hold the button for 3 seconds to turn the tablet on, or off.</li> <li>Hold the button for 2 seconds for a forced shutdown.</li> <li>Press the button to wake up the screen or turn off the screen.</li> </ul>
3	USB Port	Can be used to charge 5V electronic devices.
4	Type C Charging Slot	For charging the tablet.
5	Rear Camera	Snapshot the view ahead of the screen.
6	Loudspeaker	Convert an audio signal into a corresponding sound.
7	Backplane	Remove and install added modules on the backend.
8	Pin	Used for communication between the function module and the tablet.
9	Adjustable Stand	Keep the tablet standing at the desk, or use it to hang the tablet on the steering wheel.
10	Rubber Corner Protections	Secure the tablet from shock and accidental dropping.

## Preparation & Connection

1. Turn the ignition off.

2. Locate the vehicle's DLC port.

3. Plug the TOPDON Phoenix Plus VCI dongle into the vehicle's DLC port.

4. Turn the ignition on. The engine can be off or running.

5. Fully charge the Phoenix Plus, and hold the power button for 3 seconds to turn the tablet on. The tablet will start initializing and enter the following interface:

Note: Don't connect or disconnect any test equipment with the ignition on or engine running.

#### 6. Language Setting

Select the tool language in the following interface:

#### 7. Connect Wi-Fi

The system will automatically search all available Wi-Fi networks. You can choose the Wi-Fi needed.

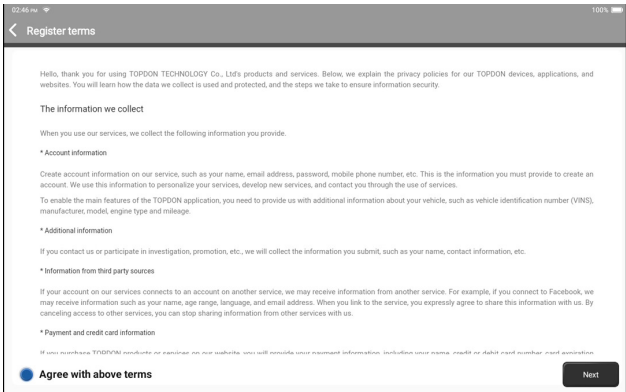

#### 8. Choose Time Zone

Choose the time zone of your current location. The system will automatically configure the time according to the time zone you selected.

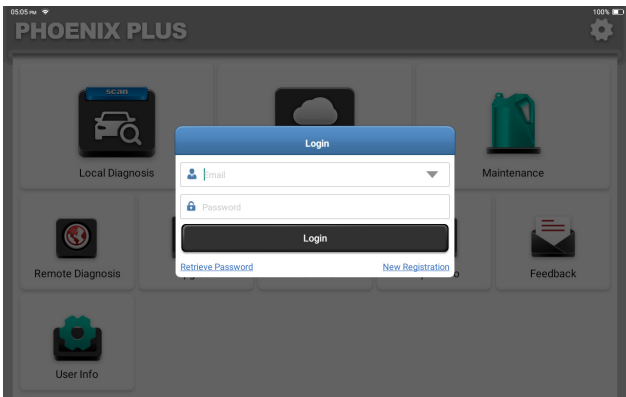

9. User Agreement

Please read all the terms and conditions of the user agreement carefully. Select "Agree to the above terms".

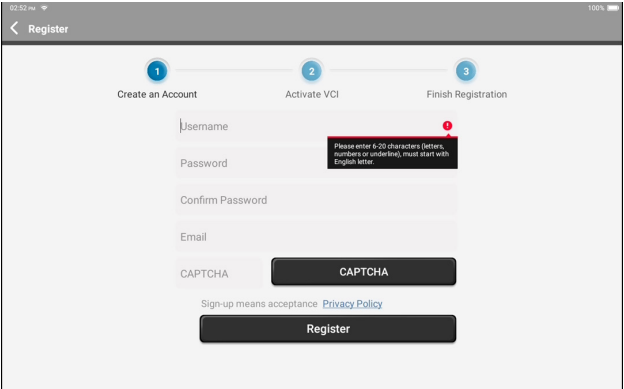

Tap "Next" to log in. The following page will appear:

10. Create an Account

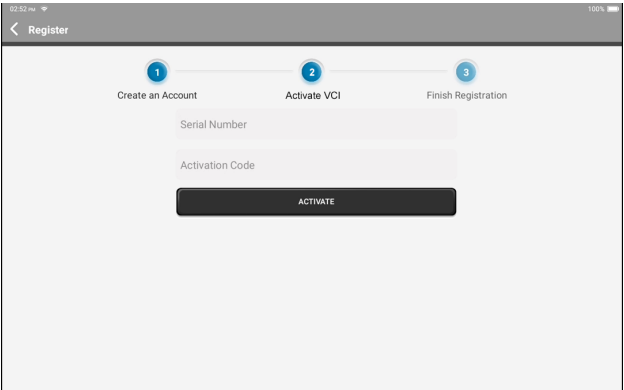

You can log in with an available TOPDON account, or register a new account with a valid e-mail address.

After inputting the information required, tap "Register". The tablet will enter the VCI Activation procedure.

11. VCI Activation

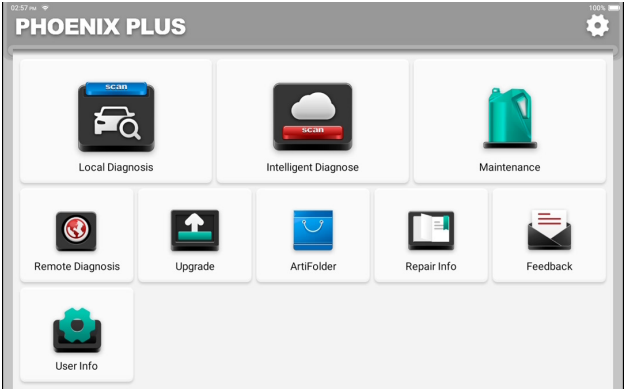

Input the serial number and activation code to activate and bind the diagnostic VCI dongle. Both the serial number and the activation code are available in the "Password Envelop". The activation procedure is necessary for using the Phoenix Plus properly.

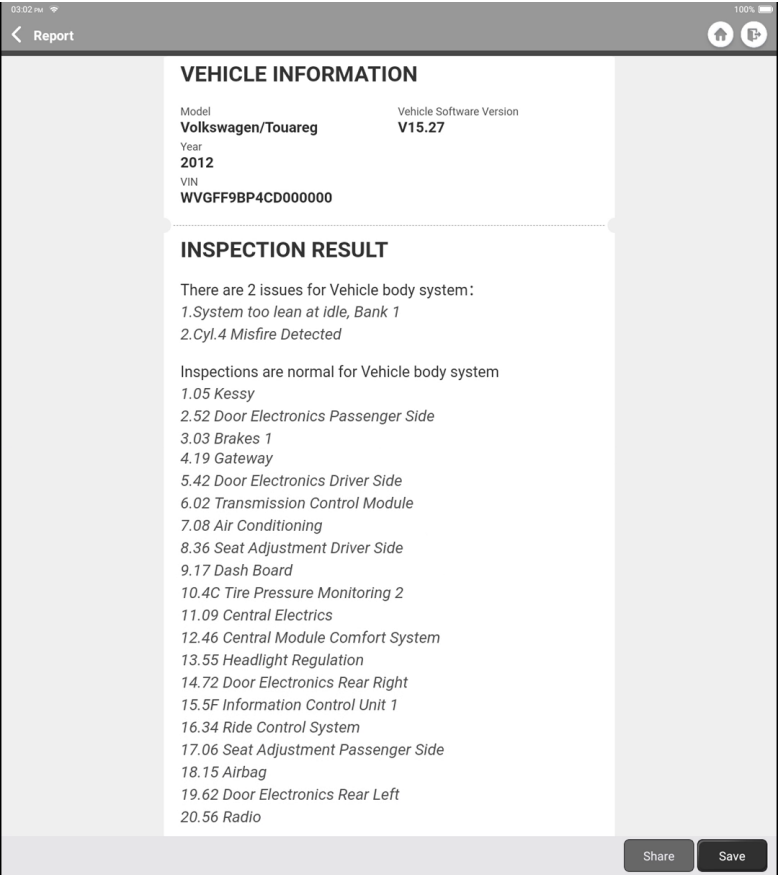

Tap "Activate" to finish the procedure, and get started to use Phoenix Plus.

# Operation Introduction

TOPDON Phoenix Plus features an array of practical functions, including Local Diagnosis, Intelligent Diagnosis, Maintenance, Remote Diagnosis, Upgrade, ArtiFolder, Repair Info, Feedback, and User Info.

TOPDON Phoenix Plus supports Intelligent Diagnosis and Local Diagnosis covering OBDII diagnosis, full system diagnosis for most modern vehicle models worldwide. A diagnostic report as follows will be automatically generated after the diagnostic procedure.

1. Intelligent Diagnosis

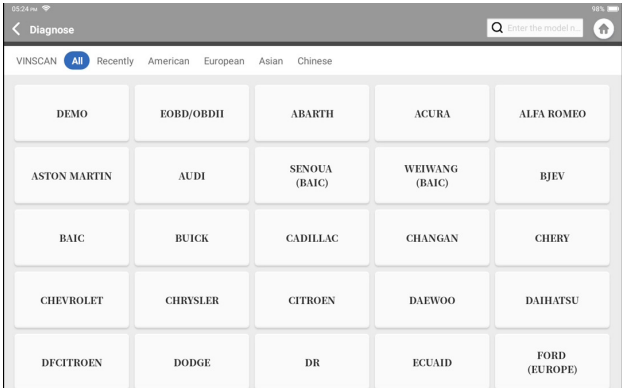

Plug the VCI dongle into the vehicle's DLC port.  
Tap "Intelligent Diagnosis" on the Home Menu after connecting to the vehicle.  
The tool will start the intelligent diagnosis procedure, and automatically read the vehicle's VIN information, as shown below:

Note: A highly stable and solid network connection is required for successful VIN access.

2. Local Diagnosis

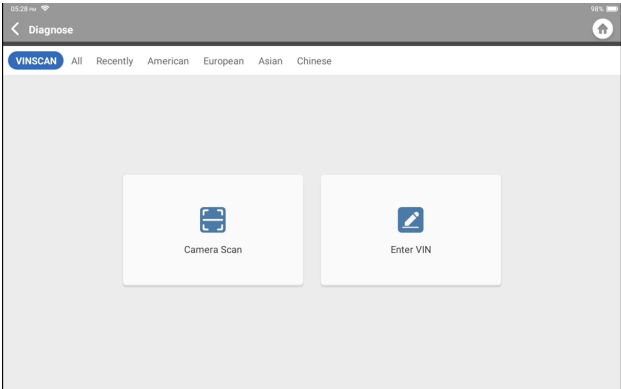

If Phoenix Plus fails to get access to the vehicle VIN data automatically, tap "Local Diagnosis" on the Home Menu. The following page will appear:

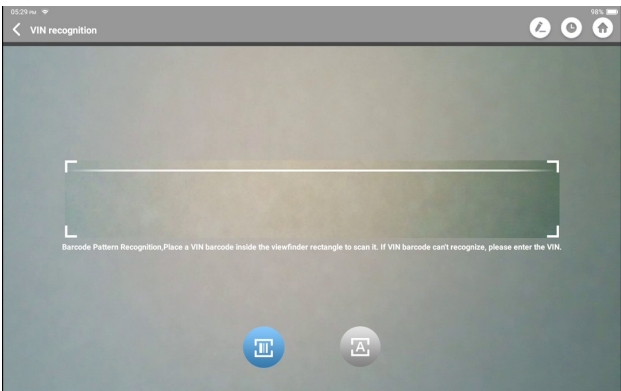

There are two ways in this module to get access to vehicle diagnostic functions.

2.1 The first way is using "VINScan".

Tap "VINScan". The following page will appear:

2.1.1 Tap "Camera Scan". The following page will appear

Tap  to scan the VIN barcode. If the VIN barcode cannot be recognized, please manually input the VIN.

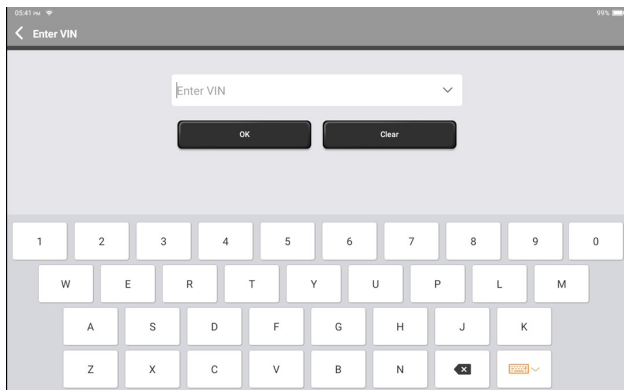

Tap  to scan the VIN character. If the VIN character cannot be recognized, please manually input the VIN.  
After scanning, the following page will appear:

Note: the VIN code in yellow can be modified if it isn't correct.

2.1.2 Or, tap "Enter VIN", the following page will appear:

You need to input the vehicle's VIN data manually.

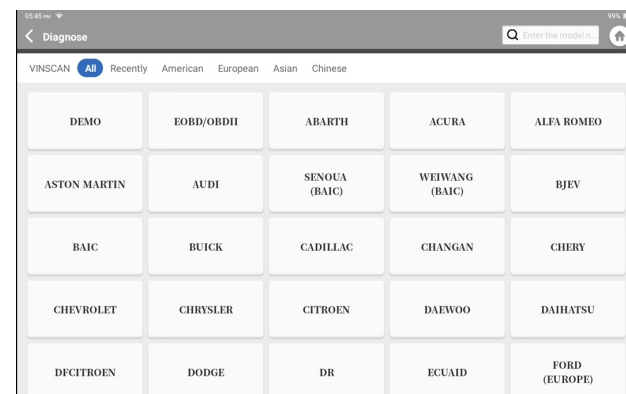

Note: VIN characters need to be capital letters A through Z and numbers 1 through 0. However, the letters I, O, and Q won't be used in order to avoid misreading. No symbols or spaces are allowed in the VIN.

After reading the VIN information successfully, the following page will appear:

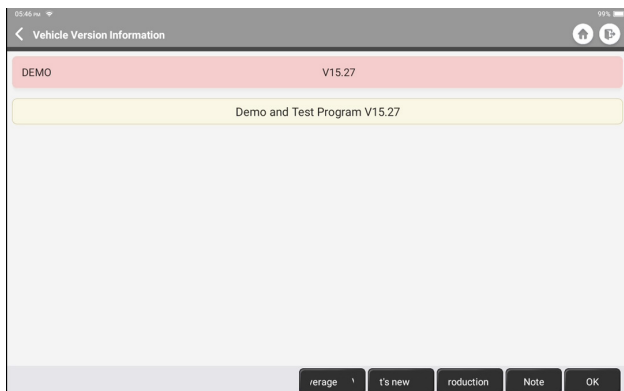

## 2.2 The second way is manually selecting the vehicle's make, model, and year.

Tap a corresponding diagnostic software logo on the following page:

Take "Demo" as an example to demonstrate. The following page will appear:

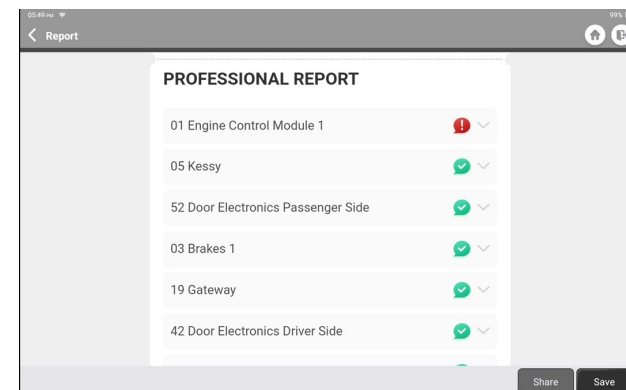

Select the diagnostic software version to continue.  
The tablet will automatically navigate to the function selection menu:

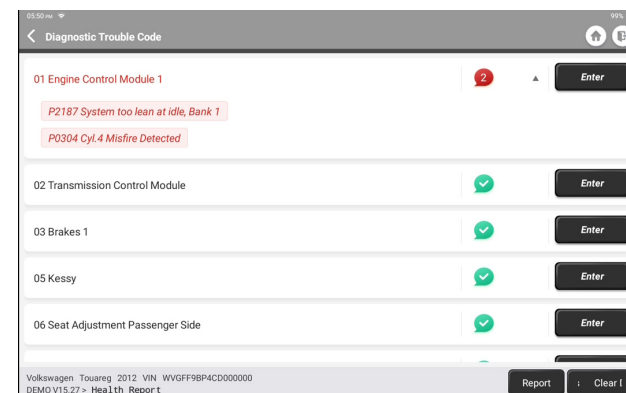

## 2.3 Health Report

This function can quickly reveal the vehicle's health status.  
Tap "Health Report". The system will start scanning DTCs and show the test results.

The systems with DTC(s) will be shown in red, with the specific definition(s).

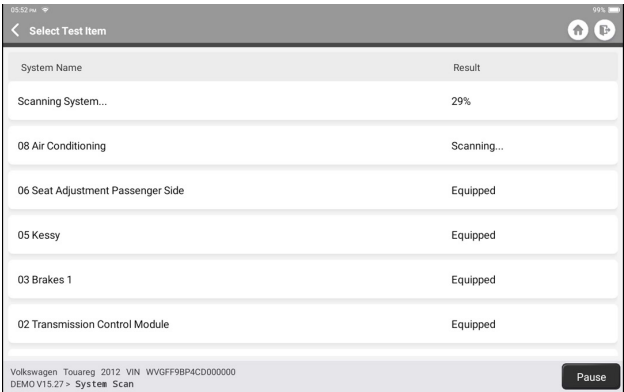

\*Explanation of terms:

- Clear DTCs: Clear all Diagnostic Trouble Codes with one simple touch.
- Report: Save the current diagnosis result as a diagnosis report.

Note: This function will be available only when the diagnostic software supports it.

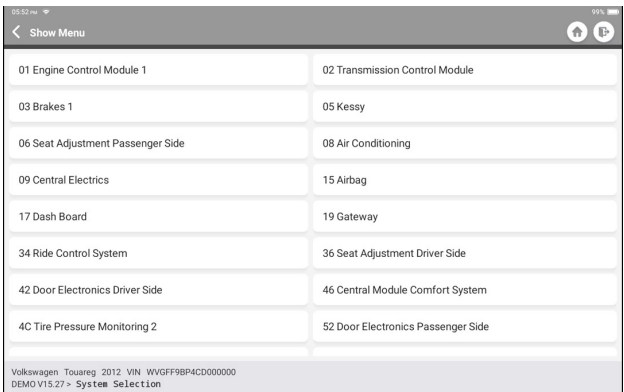

2.4 System Scan

This function will automatically scan all systems of the vehicle.

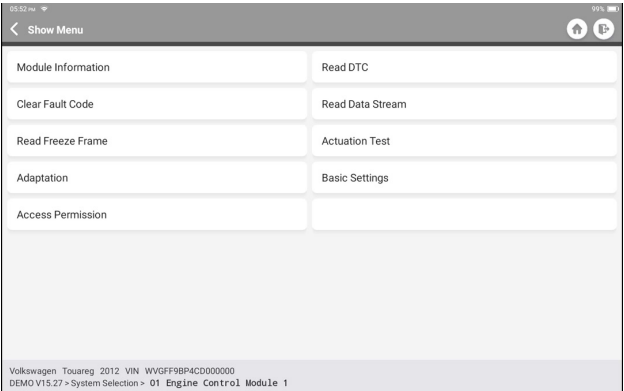

2.5 System Selection

This function allows you to manually choose the automotive electronic control system as follows:

Tap "ECM" as an example to demonstrate. The following page shows the selection interface.

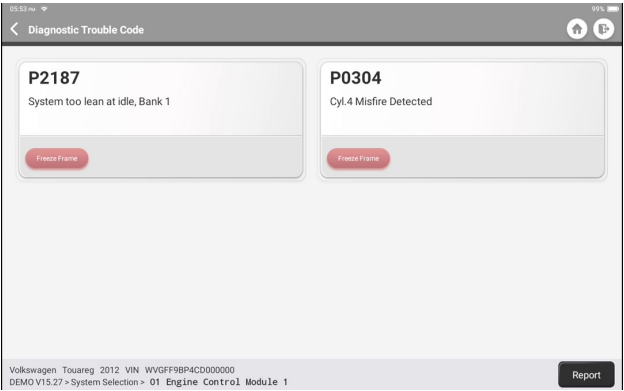

2.5.1 Module Information

This function reads the current version information of ECU.

2.5.2 Read DTC

This function can read the Diagnostic Trouble Codes (DTCs) in the ECU memory, helping quickly identify the cause of the vehicle breakdown. Tap "Read Fault Code". The screen will display diagnostic results.

\*Explanation of terms:

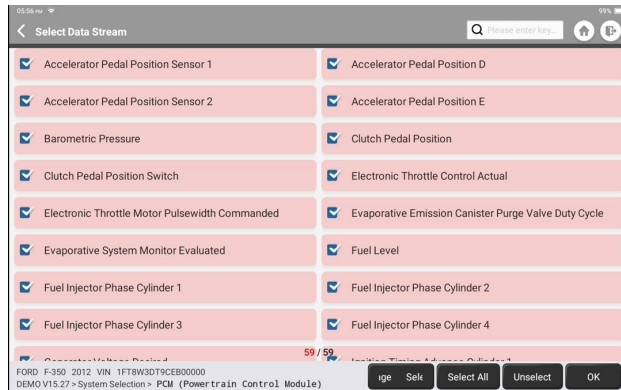

- Freeze Frame: Take a snapshot of specific data streams for verification when the DTC occurs.
- Report: Save the current diagnosis result as a diagnosis report.

### 2.5.3 Clear Fault Code

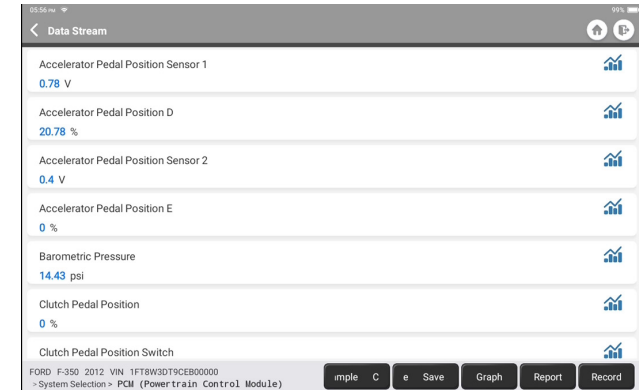

This function can clear the DTC of the ECU memory of the tested system.

### 2.5.4 Read Data Stream

This function can read and display real-time data and parameters. Tap "Read Data Stream". The following page will appear:

Select the Data Stream options you need to check. Tap "OK". The following page will appear:

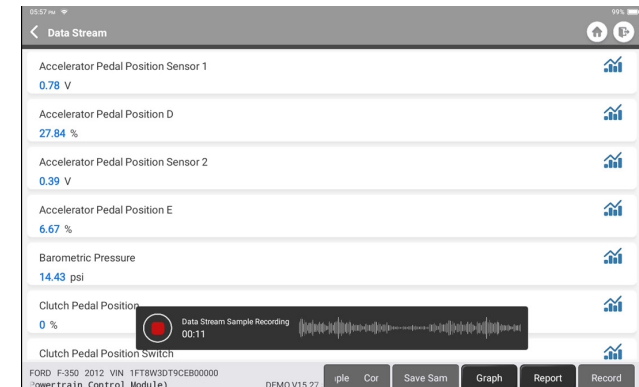

The system can display data streams in three modes:

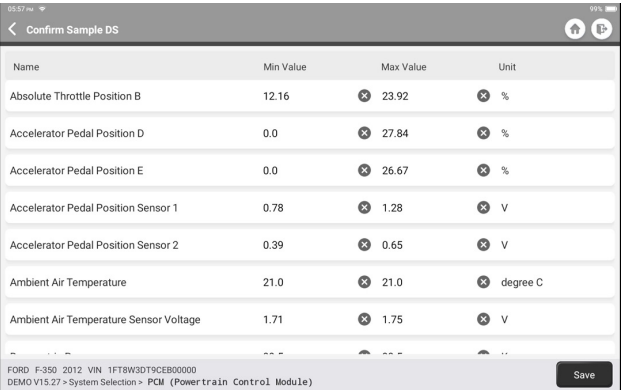

- 1) Value (default): Shows parameters with numbers and lists.
- 2) Figure: Displays parameters with wave patterns.
- 3) Combine: The graphs can be merged for easier comparisons.

\*Explanation of terms:

- Save Sample: You can save the current Data Stream as a Sample when the vehicle is running normally, and use this Sample Data Stream for future comparison and analysis. Tap "Save Sample" to start recording the sample data stream. The following page will appear:

Once the recording process is complete, tap “” to end the recording. The following page will appear:

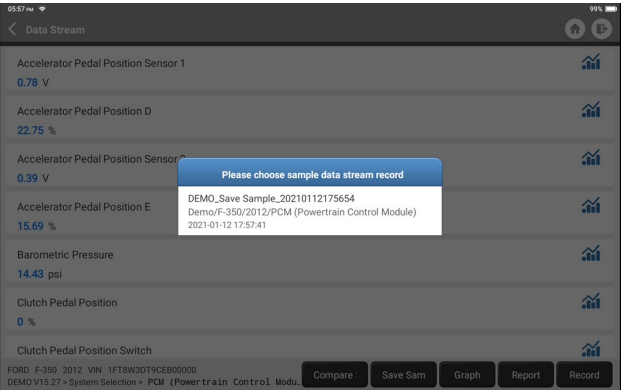

Name	Min Value	Max Value	Unit
Absolute Throttle Position B	12.16	23.92	%
Accelerator Pedal Position D	0.0	27.84	%
Accelerator Pedal Position E	0.0	26.67	%
Accelerator Pedal Position Sensor 1	0.78	1.28	V
Accelerator Pedal Position Sensor 2	0.39	0.65	V
Ambient Air Temperature	21.0	21.0	degree C
Ambient Air Temperature Sensor Voltage	1.71	1.75	V

FORD F-350 2012 VIN 1FT8W3D79CEB00000  
DEMO V15.27 > System Selection > PCM (Powertrain Control Module)

Save

You can change the Min or Max value, and tap “Save” to save it as a Data Stream Sample. All Data Stream Sample files are stored in “User Info -> Data Stream Sample”.

- Compare Sample: Tap “Compare Sample” to select the saved Data Stream Sample files. The following page will appear:

Please choose sample data stream record

DEMO\_Save Sample\_20210112175654  
Demo/F-350/2012/PCM (Powertrain Control Module)  
2021-01-12 17:57:41

Accelerator Pedal Position Sensor 1  
0.78 V

Accelerator Pedal Position D  
22.75 %

Accelerator Pedal Position Sensor 2  
0.39 V

Accelerator Pedal Position E  
15.69 %

Barometric Pressure  
14.43 psi

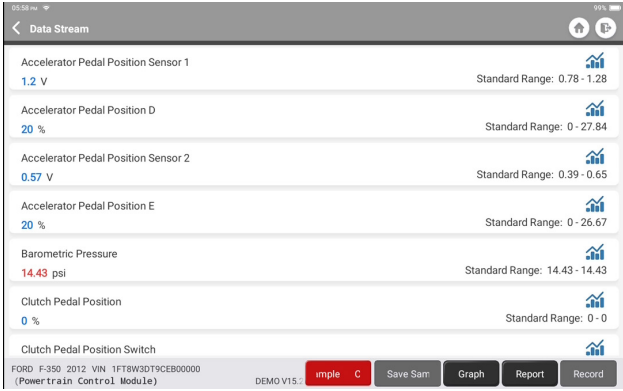

Clutch Pedal Position  
0 %

Clutch Pedal Position Switch

FORD F-350 2012 VIN 1FT8W3D79CEB00000  
DEMO V15.27 > System Selection > PCM (Powertrain Control Module)

Compare Save Sam Graph Report Record

Tap the file you need. The following page will appear:

05:58 99%

< Data Stream

Accelerator Pedal Position Sensor 1  
1.2 V Standard Range: 0.78 - 1.28

Accelerator Pedal Position D  
20 % Standard Range: 0 - 27.84

Accelerator Pedal Position Sensor 2  
0.57 V Standard Range: 0.39 - 0.65

Accelerator Pedal Position E  
20 % Standard Range: 0 - 26.67

Barometric Pressure  
14.43 psi Standard Range: 14.43 - 14.43

Clutch Pedal Position  
0 % Standard Range: 0 - 0

Clutch Pedal Position Switch

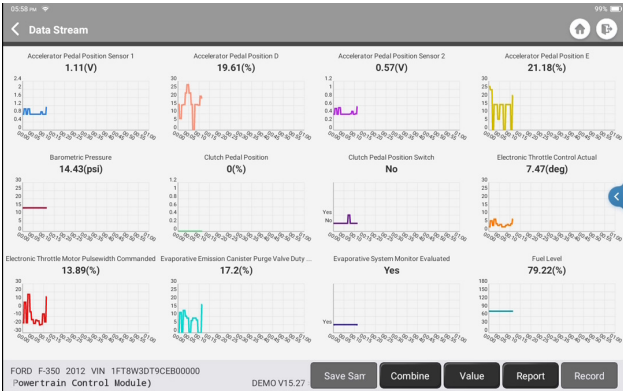

FORD F-350 2012 VIN 1FT8W3D79CEB00000  
(Powertrain Control Module)

DEMO V15.27

imple C Save Sam Graph Report Record

The Standard Range column will show the corresponding Data Stream Sample values for your comparison and analysis.

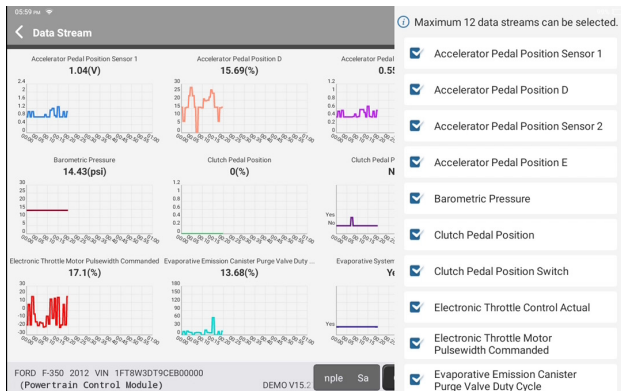

- Graph: To have the selected data streams (12 max items) displayed in wave patterns. Tap “Graph”. The following page will appear:

Tap “Combine” to merge graphs for easier comparisons (max 4 values can be merged).

Tap “Value” to view the data displayed in values.

Tap “<” on the right side of the screen. The following page will appear:

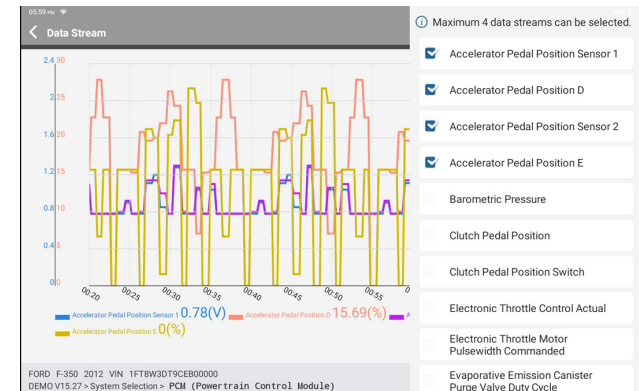

You can select specific data stream options to be viewed on the left.  
Note: A maximum of 12 data streams can be displayed in this module.

- Report: To save the number of current data streams.
- Record: To record the diagnostic data for further analysis.
- 🏠 : To view single data stream displayed in wave patterns. Tap "🏠". The following page will appear:

Tap "Min/Max" to define the maximum/minimum value. Once the value goes beyond the specified value, the data will be shown in red.  
Tap "<" on the right side of the screen. The following page will appear:

You can select specific data stream options to be viewed on the left.  
Note: A maximum of 4 data streams can be displayed in this module.

## 2.5.5 Actuation Test

This function is used to find out whether a specific subsystem or component in vehicles goes well or not, by testing output elements instead of checking in ignition status.

### 3. Maintenance Services

TOPDON Phoenix Plus is loaded with maintenance services to be very beneficial for technicians and mechanics working in the automotive repair industry.

#### 3.1 Maintenance Light Reset

This function enables you to reset the oil service lamp for the engine oil life system, which calculates an optimal oil life change interval depending on the vehicle driving conditions and weather events.

It needs to be performed in the following cases:

- If the service lamp is on, run car diagnostics first for troubleshooting. After that, reset the driving mileage or driving time, so as to turn off the service lamp, and enable a new driving cycle.
- If the service lamp is not on, but you have changed the engine oil or electric appliances that monitor oil life, you need to reset the service lamp.

#### 3.2 Throttle Matching

This function can utilize the car decoder to initialize the throttle actuator so that the learning value of the ECU returns to the initial state. By doing so, the movement of the throttle (or idle motor) can be more accurately controlled, thus adjusting the intake volume.

It needs to be performed in the following cases:

- After replacing the electronic control unit, the relevant characteristics of the throttle operation have not been stored in the electronic control unit.
- After the electric control unit is powered off, the memory of the electric control unit's memory is lost.
- After replacing the throttle assembly, you need to match the throttle.
- After replacing or disassembling the intake port, the controlling of the idle speed by the coordination between the electronic control unit and the throttle body is affected.
- The intake volume and the idle control behavior has changed while staying at the same throttle opening position, although the idle throttle potentiometer behavior hasn't changed.

#### 3.3 Steering Angle Reset

This function can reset the steering angle to zero to keep the car running straight.

It needs to be performed generally after replacing the steering angle position sensor, or after replacing the mechanical parts of the steering system (such as steering gear, steering column, tie rod ball head, steering knuckle), or after completing the four-wheel positioning, body repair, etc.

#### 3.4 Battery Matching

This function can reset the monitoring unit of the car battery, by clearing the original breakdown information about the lack of battery power to rematch the battery.

It needs to be performed in the following cases:

- Replacement of the main battery needs to utilize battery matching to clear the former information about the lack of power, thus avoiding false information detected by the relevant control module which may cause the failure of some electronic auxiliary functions. For example, the vehicle automatically stops; the sunroof can't work by one key; electric windows can't open and close automatically.
- The battery monitoring sensor uses the battery matching function to re-match the control module with the monitoring sensor, so as to detect the use of the battery power more accurately, and avoid receiving wrong information from instrument prompts which will cause false alarms.

#### 3.5 ABS Bleeding

This function enables you to perform tests to check the operating conditions of the Anti-lock Braking System (ABS).

It needs to be performed in the following cases:

- When the ABS contains air.
- When the ABS computer, ABS pump, brake master cylinder, brake cylinder, brake line, or brake fluid is replaced.

#### 3.6 Electronic Parking Brake Reset

This function helps you to replace and reset the brake pad.

It needs to be performed in the following cases:

- The brake pad and brake pad wear sensor are replaced.
- The brake pad indicator lamp is on.
- The brake pad sensor circuit is short, which is recovered.
- The servo motor is replaced.

#### 3.7 DPF Regeneration

This function can help remove particulate matter from the trap by using combustion oxidation methods to keep the performance of the trap stable.

It needs to be performed in the following cases:

- Replace the exhaust back pressure sensor.
- Disassembly or replacement of the particle trap.
- Removal or replacement of fuel additive nozzles.
- Removal or replacement of catalytic oxidizer.
- The DPF regeneration fault lamp is lit and matched after maintenance.
- Repair and replace the DPF regeneration control module.

### 3.8 Tooth Learning

This function can perform tooth learning for the car, to turn off the MIL

It needs to be performed in the following cases:

- After the engine ECU, crankshaft position sensor, or crankshaft flywheel is replaced.
- The DTC "tooth not learned" is present.

### 3.9 Anti-theft Matching

This function can match the anti-theft key after replacing the ignition key, ignition switch, instrument cluster, engine control unit (ECU), body control module (BCM), and remote control battery.

### 3.10 Injector Coding

This function can write injector actual code or rewrite code in the ECU to the injector code of the corresponding cylinder, so as to have more accurately control or correct cylinder injection quantity.

It needs to be performed in the following cases:

- After the ECU or injector is replaced.

### 3.11 Tire Pressure Reset

This function can reset the tire pressure and turn off the tire pressure fault indicator when the car tire pressure fault indicator light is on.

### 3.12 Suspension Level Calibration

This function can adjust the vehicle body height sensor for level calibration after replacing the vehicle height sensor or control module in the air suspension system, or when the vehicle level is not correct.

### 3.13 AFS (Adaptive Front-lighting System) Reset

This function enables you to initialize the adaptive headlamp system.

### 3.14 A/T Learning

This function helps complete the gearbox self-learning to improve gear shifting quality.

It needs to be performed in the following cases:

- When the gearbox is disassembled or repaired (after some of the car battery is powered off), which leads to shift delay or impact problem.

### 3.15 Sunroof Initialization

This function enables you to set the sunroof lock off, or closed when it rains; the sliding / tilting sunroof memory function; the temperature threshold outside the car etc.

### 3.16 EGR Adaption

This function can learn the EGR (Exhaust Gas Recirculation) valve after it is cleaned or replaced.

### 3.17 ODO Reset

This function can copy, write, or rewrite the value of kilometers in the chip of odometer, so that the odometer shows the actual mileage.

It needs to be performed in the following cases:

- When the mileage is not correct due to the damaged vehicle speed sensor or the odometer failure.

### 3.18 Airbag Reset

This function resets the airbag data to clear the airbag collision fault indicator, so that the airbag computer in the vehicle can run normally.

It needs to be performed in the following cases:

- When the vehicle collides and the airbag deploys, the corresponding fault code of the collision data appears, the airbag indicator lights up, and the fault code cannot be cleared.

### 3.19 Transport Mode

This function can deactivate the transport mode, so that the vehicle can function normally.

It needs to be performed in the following cases:

- When the following functions disabled including limiting the vehicle speed, not waking up the door opening network, and disabling the remote control key, etc. in order to reduce the power consumption.

### 3.20 A/F Reset

This function can set or learn Air/Fuel ratio parameters.

### 3.21 Stop/Start Reset

This function can open or close the automatic start-stop function via setting the hidden function in ECU (provided that the vehicle has a corresponding hidden function supported by hardware).

### 3.22 NOx Sensor Reset

This function can reset the catalytic converter learned value stored in the engine ECU.

It needs to be performed in the following cases:

- When the NOx fault is re-initialized and the NOx catalytic converter is replaced.

### 3.23 AdBlue Reset (Diesel Engine Exhaust Gas Filter)

After the diesel exhaust treatment fluid (car urea) is replaced or filled up, urea reset operation is required.

### 3.24 Seat Calibration

This function can match the seats with memory function that are replaced and repaired.

### 3.25 Coolant Bleeding

This function can activate the electronic water pump before venting the cooling system.

### 3.26 Tire Reset

This function can set the size parameters of the modified or replaced tire.

### 3.27 Windows Calibration

This feature can perform door window matching to recover ECU initial memory, and recover the automatic ascending and descending function of power window.

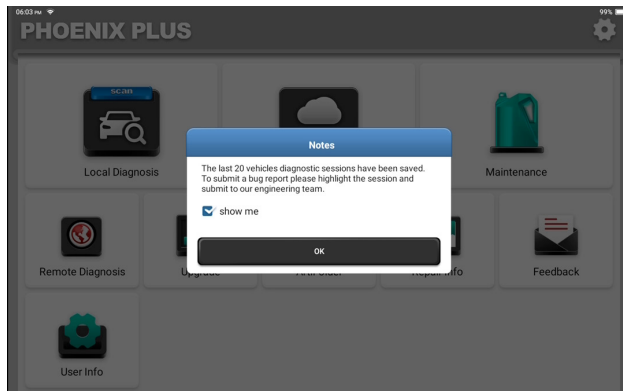

### 3.28 Language Change

This function can change the system language of the vehicle central control panel.

## 4. Diagnostic Feedback

You can send the last 20 test records to us by using "Feedback" feature for timely technical assistance if you encounter any unsolved problems in the diagnostic process.

Tap "Feedback" on the Home Menu. The following page will appear:

Tap "OK" to enter the vehicle diagnostic feedback selection menu.

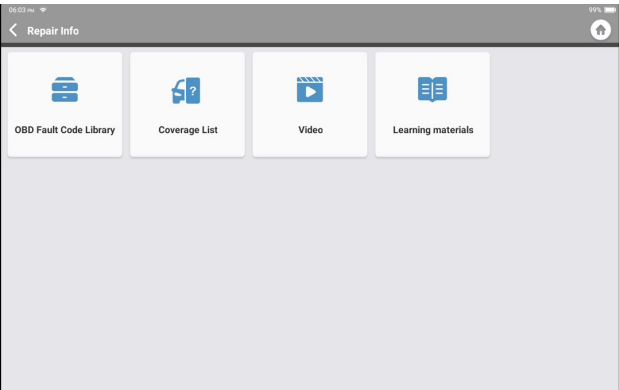

\*Explanation of terms:

- Diagnostic Feedback: To show the tested vehicle model list.
- History: To view all diagnostic feedback and check the processes.
- Offline List: To display all diagnostic feedback logs which have not been submitted successfully yet due to the network failure. The failed logs will be re-uploaded automatically once the tablet gets the stable network signal.

Our technical support will handle your feedback in time for your satisfaction.

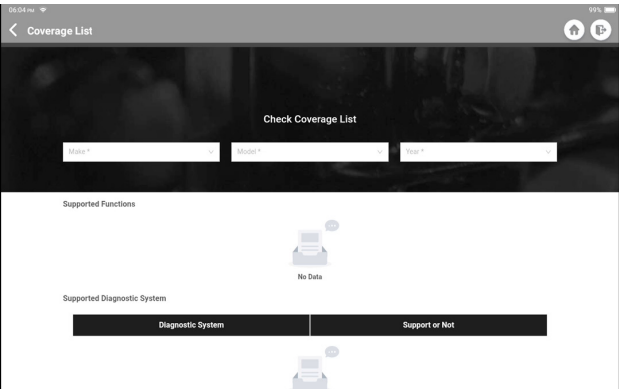

5. Repair Info

Tap "Repair Info" on the Home Menu. The following page will appear:

5.1 OBD Fault Code Library: To view the definition of DTCs (Diagnostic Trouble Codes).

5.2 Coverage List: To view the supported functions and car systems after selecting the vehicle make, model, year, and inputting information required on the following page:

5.3 Video: To view the training videos for your reference.

5.4 Learning Materials: To view the playback of operating functions on specific vehicle models.

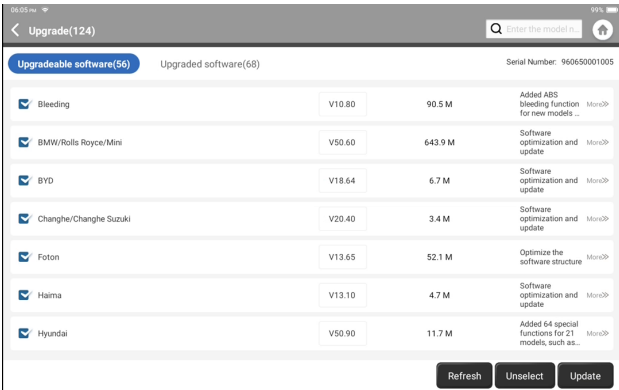

6. ArtiFolder

This module can record and establish the file of the diagnosed vehicles, including all diagnostic-related data such as diagnostic reports, data stream records, and screenshots.

7. Upgrade

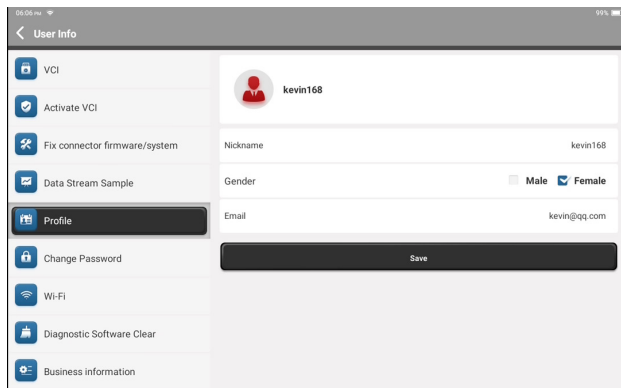

This module allows you to update the diagnostic software & App to the latest version. Tap "Upgrade" on the Home Menu. The following page will appear:

Tap "Update" to upgrade the selected software.

## 8. User Info

You can modify or add related information in this module, or make settings.

### 8.1 VCI

This option allows you to choose the suitable VCI dongle if there are several dongles registered on this tablet.

### 8.2 Activate VCI

This option can activate a new VCI dongle.

Input the Serial Number and Activation Code, and then tap "Activate" to activate the VCI dongle. Its serial number will be displayed in the list after the procedure.

### 8.3 Fix Connector Firmware/System

This option can repair the connector firmware. Please don't power off or switch interfaces in the process.

### 8.4 Data Stream Sample

This option manages the recorded data stream sample files.

### 8.5 Profile

This option manages the recorded data stream sample files.

### 8.6 Change Password

This option can change the login password.

### 8.7 Wi-Fi

This option sets up Wi-Fi networks that can be connected.

### 8.8 Diagnostic Software Clear

This option can clear some cache files and free up the storage space.

### 8.9 Business Information

This option can add information about the workshop, which will be displayed in the diagnostic report.

### 8.10 Customer Management

This option manages the information and data of clients.

### 8.11 Photo Album

This module saves the screenshots.

### 8.12 Screen Recorder

This module saves the screen recordings.

### 8.13 Settings

This option makes settings including Units, Language, Clear Cache, Mode Switch, Restore Factory Settings, and Log Out.

## Technical Specification

---

Operating System: Android 10.0

Screen: 10" Touchable; 1280 \* 800

Memory: 4G

Storage: 64G

Battery Capacity: 6,000mAh/7.6V

Camera: Rear 8.0MP

Network: Wi-Fi, WLAN 802.11b/g/n

Bluetooth: Bluetooth 5.0

Working Temperature: 32°F~122°F (0°C~50°C)

Storage Temperature: -4°F~140°F (-20°C~60°C)

Demission: 10.92\*7.51\*1.75 inches (277.3\*190.8\*44.5 mm)

Weight: 54.85 oz (1555g)

## Warnings

---

- ✔ Always perform automotive testing in a safe environment.
- ✔ DO NOT smoke near the vehicle during testing.
- ✔ DO NOT place the diagnostic tool near the engine or exhaust pipe to avoid damage from high temperatures.
- ✔ DO NOT wear loose clothing or jewelry when working on an engine.
- ✔ DO NOT connect or disconnect any test equipment while the ignition is on or the engine is running.
- ✔ DO NOT disassemble the code reader.
- ✔ Engine parts will become hot when the engine is running. To prevent severe burns, avoid contact with hot engine parts.
- ✔ When an engine is running, it produces carbon monoxide, a toxic and poisonous gas. Operate the vehicle ONLY in a well-ventilated area.
- ✔ Wear safety eye protection that meets ANSI standards.

## Cautions

---

- ✔ Please ensure that the vehicle battery is fully charged and the scanner is firmly connected to the vehicle DLC to avoid erroneous data generated by the scanner and diagnostic systems.
- ✔ Please do not use the diagnostic tool during driving.
- ✔ Keep clothing, hair, hands, tools, test equipment, etc. away from all moving or hot engine parts.
- ✔ Keep the scanner dry, clean, free from oil/water, or grease. Use a mild detergent on a clean cloth to clean the outside of the scan tool, when necessary.
- ✔ Keep the scanner out of the reach of children.

## FAQ

Q: The tablet cannot be turned on after being fully charged.

A:

Possible Cause	Solution
The tablet has been idle for too long, and the battery drains.	Charge it for over 2 hours before turning it on.
Problem of the Charger.	Please contact the dealer or TOPDON after-sale service for timely support.

Q: Why cannot register?

A:

Possible Cause	Solution
The tablet isn't connected to a network.	Charge it for over 2 hours before turning it on.
Your email address may have been registered already.	Use another valid email address.
There is no verification code in the email box.	Check if the email address is valid and resent the code.
Server problem.	Server maintenance. Please try again later.

Q: Why cannot login?

A:

Possible Cause	Solution
The tablet isn't connected to a network.	Make sure the network is stable.
The user name or password is not correct.	<ul style="list-style-type: none"><li>• Check the user name and password.</li><li>• Contact TOPDON after-sales support to get the user name and password.</li></ul>
Server problem.	Server maintenance. Please try again later.

Q: Why can't activate the equipment?

A:

Possible Cause	Solution
The tablet isn't connected to a network.	Make sure the network is stable.
The serial number and activation code are not correct.	Check the serial number and activation code and make sure they are correct (serial number 12 digits, activation code 8 digits).
The activation code is invalid.	Contact TOPDON after-sales service to get support.
The configuration is empty.	Contact TOPDON after-sales service to get support.

Q: The tablet is not activated while updating?

A:

Possible Cause	Solution
The VCI dongle may not be activated in the registration process.	Activate the VCI dongle as follows: Tap "User Infor" -> "Activate VCI" -> Input the correct serial number and activation code -> "Activate".

**Q:** Why cannot register?

**A:**

Possible Cause	Solution
The tablet isn't connected to a network.	Make sure the network is stable.
The user name or password is wrong	Check the user name and password.
The equipment doesn't have enough memory.	Uninstall irrelevant applications and delete uncommonly used vehicle software.
Server problem.	Server maintenance. Please try again later.

**Q:** There is no power in the VCI dongle after connecting to the vehicle's DLC port.

**A:**

Possible Cause	Solution
Poor contact of the VCI dongle.	Plug out the VCI dongle, and then plug it in again.
Poor contact of vehicle's DLC port.	Plug out the VCI dongle, and then plug it in again.
Too low voltage of the vehicle battery.	<ul style="list-style-type: none"><li>• Recharge the vehicle battery.</li><li>• Replace the vehicle battery if it is damaged.</li></ul>
Damage of the VCI dongle.	Server maintenance. Please try again later.

**Q:** The tablet cannot establish a connection with the VCI dongle.

**A:**

Possible Cause	Solution
Poor contact of the VCI dongle.	<ul style="list-style-type: none"><li>• Plug out the VCI dongle, and then plug it in again.</li><li>• Perform the VCI Bluetooth pairing again.</li></ul>
The firmware is damaged.	Enter the settings and tap "Fix Connector Firmware/System" to fix the firmware.

**Q:** Can I use other chargers to charge the tablet?

**A:** No, please use the original charger provided by TOPDON.

Any damage and economic loss caused by using the improper battery charger will not be our responsibility.

**Q:** How to save the battery power?

**A:** Please switch off the screen while the tablet is idle, or set a short standby time, or reduce the brightness of the screen.

**Q:** Are there non-standard OBDII adapters in the box?

**A:** Yes.

**Q:** Communication error with vehicle ECU?

**A:** Please confirm the following cases:

- Whether the diagnostic VCI dongle is correctly connected.
- Whether the ignition switch is ON.

Or, send your vehicle's year, make, model, and VIN data to us via the "Feedback" feature for timely technical assistance.

**Q:** Failed to get access to the vehicle's ECU system?

**A:** Please confirm the following cases:

- Whether the system is available in the vehicle.
- Whether the VCI dongle is correctly connected.
- Whether the ignition switch is ON.

**Q:** The VCI dongle is missing.

**A:** Please contact the dealer or TOPDON after-sale service for timely support.

**Q:** Error of the diagnostic software.

**A:** Please operate as follows:

- Tap "Feedback" to send specific problems to us for technical support.
- Tap the vehicle software icon, and hold it to uninstall the corresponding software, and then enter the upgrade center to download and install the new version.

**Q:** The downloaded diagnostic software is inconsistent with the serial number.

**A:** Selected the wrong VCI dongle.

Enter the "User Info" -> "VCI" -> select the right VCI dongle.
